SKILL LAB ACTIVITY REPORT

Student Activity Points – Full Stack Development

Academic Year: 2026–2027

1. General Information

Particulars	Details
Activity	Skill Lab – Full Stack Development
Date	24 October 2026
Day	Saturday
Venue	CS 101
Start Time	9:00 AM
End Time	4:30 PM
Total Duration	7 Hours 30 Minutes
Track	Full Stack Development

3. Student Participation Details

Volunteers:

Name	Arnav	Mohammad Abdul Rahman Ashraf
USN	1RV24CI022	1RV24CI068
E-mail ID	arnav.ai24@rvce.edu.in	mabdulrahmana.ai24@rvce.edu.in
Phone Number	+91 73497 28002	+91 70221 52697
Semester	5	5
Branch	CSE-AIML	CSE-AIML

2. Objective of the Activity

The Full Stack Development Skill Lab was conducted to provide students with practical exposure to modern web development technologies and concepts. The session aimed to introduce and strengthen students' understanding of

- frontend and backend development
- application architecture
- database integration
- development of functional web applications.

The primary objective was to

- develop practical programming skills
- an understanding of the complete web application development lifecycle.

4. Detailed Activity Description

Date: 24 October 2026
Venue: CS 101
Track: Full Stack Development

Session Details

Time: 9:00 AM – 4:30 PM

Activity Description:

The session introduced the fundamentals of Full Stack Development, explaining its importance in building complete web applications. Participants were taught about frontend development (HTML, CSS, JavaScript, and React), backend development (Node.js, Express, and Python), and database management (PostgreSQL, MySQL, and MongoDB).

The session covered how these components communicate through APIs, the process of developing and integrating frontend and backend systems, and the basics of deploying web applications. Different technology stacks, including MERN and PERN, were also discussed, helping participants understand how to select an appropriate technology stack based on project requirements.

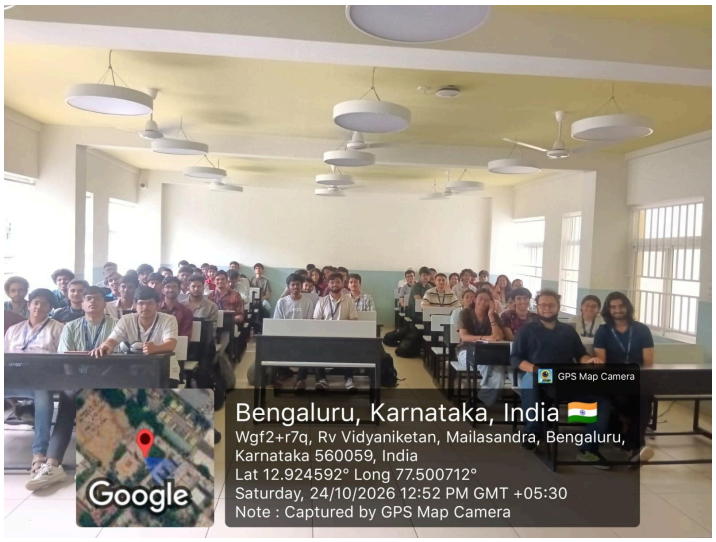

The session was intended to develop practical knowledge of frontend development, backend programming, database management and the integration of different components required to build functional web applications.

Further on, the session was continued with QnA and suggestions for the students on various online websites and tools that could be of help in the matter of development for placements and skills.

Topics Covered:

1. Introduction to Full Stack Development.
2. Frontend Development Fundamentals.
3. Backend Development Concepts.
4. Database Management and Integration.
5. PERN solution stack.
6. Introduction to Deployment tools (Render and Vercel).
7. Skill Development Tools (roadmap.sh, freecodecamp.org, rxresu.me)

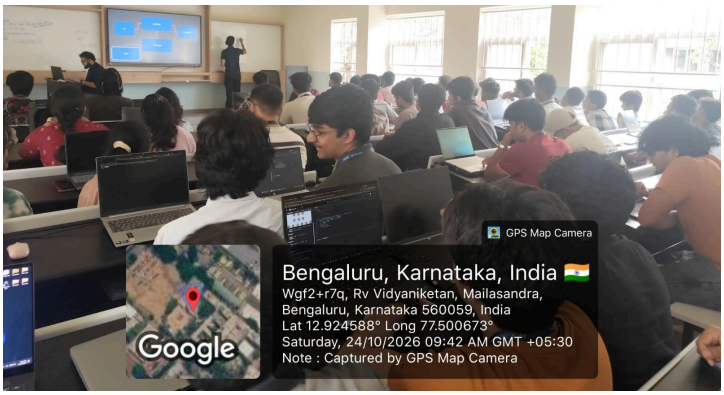

5. Photographic Evidence

6. Declaration

This report is submitted as documentation of the Full Stack Development Skill Lab conducted on 24 October 2026 at CS 101.

The report includes the activity details, student participation records, session schedule and supporting photographic evidence for verification and consideration towards student activity point allocation.

7. Approval and Verification

Authority	Name	Signature	Date
Skill Lab Coordinator			
Head of Department (HOD)			
Dean - Student Affairs			

Submitted for verification and approval of Student Activity Points.
